- Dana – HOG—
 - Chapter Challenge—last month 179; now we are down to 194; only 7 people have recorded their mileage at the dealership.
 - Could there be someone from the dealership in the spring to record the mileage in the spring?
 - Has not made a decision on the chapter manager role from Robert.
 - Will let you know if WHD will accept a picture of your mileage—will accept a picture according to some members.
- OFFICERS REPORTS
 - Casey – patches
 - Earl and Stacy—not here for 10 year rockers
 - 2 year for Carrie Short
 - Dave - Head Road Captain
 - Two rockers have been promoted to Road Captains: Bob Mindemann and Michael Greco; Return of Greg Barre

- **How to handle severe crosswinds information**—relax and drop your elbows; allow a little instability; lean forward; snug up the jacket; can gain or lose traction in the wind; all the weight remains on your tires; don't over compensate for the wind or you might tip over; Gusts—sometimes the concrete wall acts as a buffer; do your best to maintain control; must counter steer to correct it; anticipate the wind shear—it is important to maintain a firm grip; going over a bridge or coming up to the rear of a semi; heavier bike will help the control factor some...but not completely; if the crosswinds are more sustained either park the bike or pucker up and keep going!
